

BannerDrop™

**Turn ceiling space
into advertising space
with BannerDrop™
Display Systems!**

- Raises and lowers banners up to 18m
- Patented indexing system keeps your display level at all heights.
- Eliminates the need for expensive lifts and labor charges during ad change-outs.
- UL-approved solid state mechanical unit with remote control.

BannerDrop™ Display System

BannerDrop™ STOPS all these headaches :

- ✓ Coordinating lift rentals & logistics
- ✓ Moving lift to and from display site
- ✓ Cleaning up tire marks and liquid spills
- ✓ Safety issues related to aerial work platforms
- ✓ Expensive insurance coverage from high reach installations

You do the math!

A Wide Variety of Display Articles are All Possible

BannerDrop™'s versatile system allows for nearly any kind of display! Die-cut shapes, horizontal and vertical banners, framed displays, silk flags or drapes can all be raised or lowered at the press of a button.

UL approved tubular motor controlled by internal radio receiver provides safe and reliable operation.

Anodized aluminum BannerBar™ extrusion provides clean presentation and keeps banners smooth.

Aluminum pocket assembly provides clean, smooth appearance. Pockets can be painted to match any ceiling color.

Patented cable indexing system eliminates wire tangling concerns and keeps banners level at all heights.

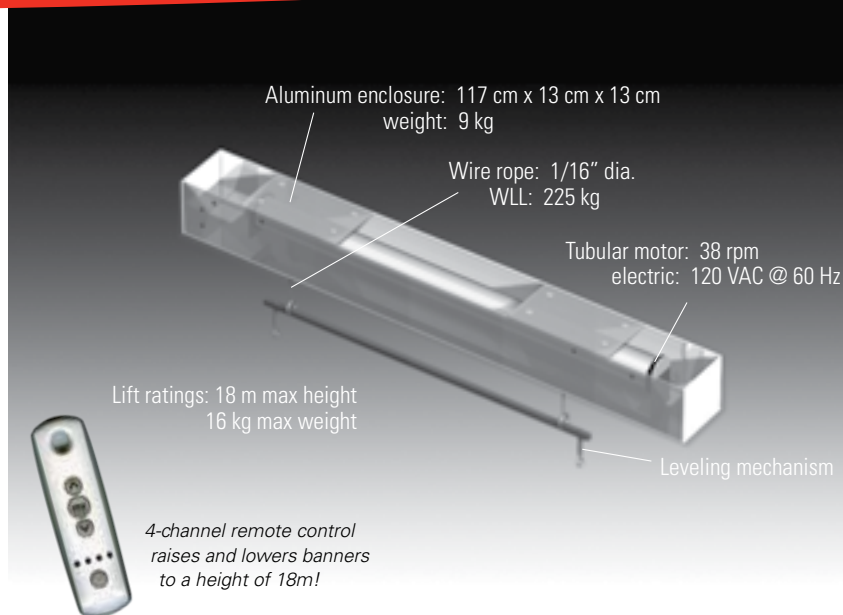

Stainless steel cables provide years of maintenance-free service.

BannerDrop™ Display System

Turn ceiling space into selling space with BannerDrop™ display systems!

BannerDrop™ is a patented mechanical system for raising and lowering display articles using wire rope and an indexing mechanism that eliminates wire tangling and assures that display articles remain level at all heights.
